Applicant's election with traverse of Group II, claims 21-37, 57-61 in Paper No. 7 is acknowledged. The traversal is on the ground(s) that no examples are shown for the reasoning. This is not found persuasive because each of the Groups are distinct and independent inventions as described.

The requirement is still deemed proper and is therefore made FINAL.

10 The claims as presented are not searchable. Claims 21-37 require magnetic particles and many permutations of broadly stated components, some of which are not understood. Claims 57-61 may be directed to a different function, do not require magnetic particles and are not fully understood as claimed. It 15 is suggested that applicants claim a single searchable reagent that is fully enabled by the specification as originally presented.

This application contains claims directed to the following patentably distinct species of the claimed invention: Many permutations of many components are claimed.

20 Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An 5 argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the 10 limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are 15 not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or 20 admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ralph Gitomer whose telephone number is (703) 308-0732. The examiner can normally be reached on Tuesday-Friday from 8:00 am - 5:00 pm.

5 The examiner can also be reached on alternate Mondays. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Wityshyn can be reached on (703) 308-4743. The fax phone number for this Art Unit is (703) 308-4556. Any inquiry of a general nature or relating to the status
10 of this application should be directed to the Group receptionist whose telephone number is (703) 308-1235. For 24 hour access to patent application information 7 days per week, or for filing applications electronically, please visit our website at
